

ROEEA GUIDELINES

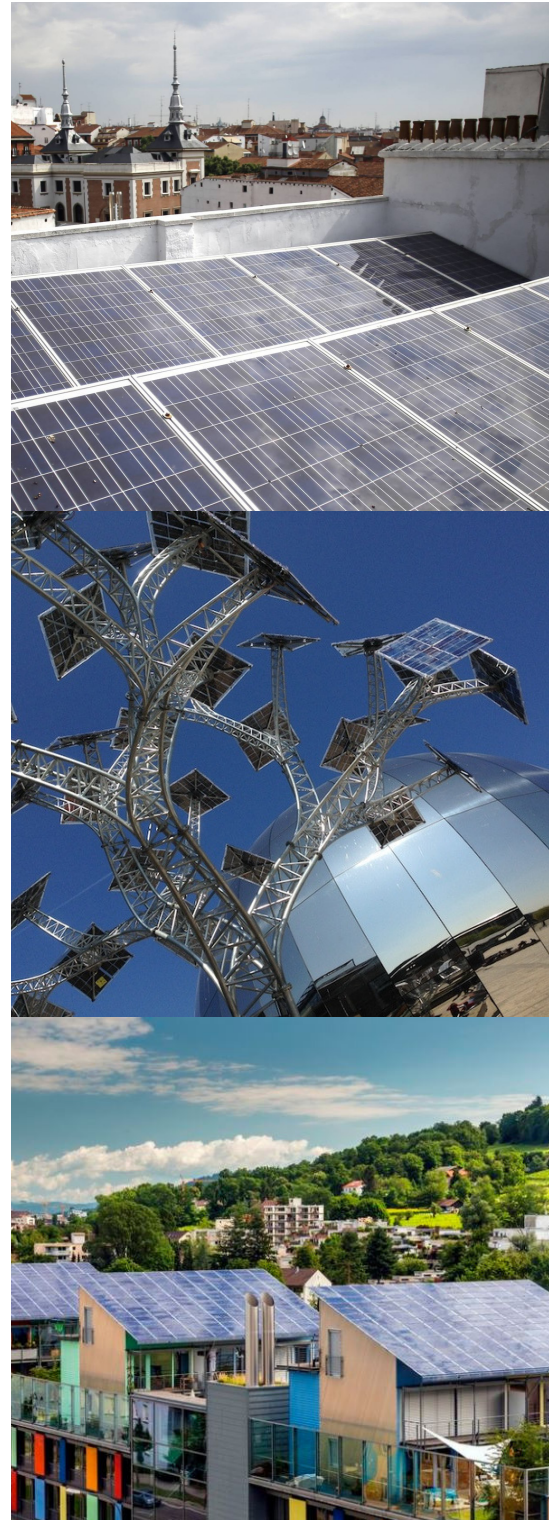

Successfully Implementing local energy and climate measures

EUROPEAN CONTEXT

Founded in 2002 by Switzerland, Austria and Germany, the EEA has successfully been established in several European countries and beyond and supports an increasing number of local authorities in improving their local energy and climate policy. More than 1,500 local authorities in Europe participate in the EEA, representing a total of 48 million inhabitants.

ROEEA MISSION

The quality management system RoEEA establishes and supports interdisciplinary local energy and climate planning and action as well as a process-oriented and long-term energy and climate policy on the local level.
